

# Balancing Nails

**This is a puzzle that requires 11 nails and a block of wood.**

**You first show a block of wood with one nail standing up in it. 10 other nails are laying on the table.**

**Ask if anyone is able to balance all 10 nails on top of the one nail. No magnets, tape, glue, rubber bands etc., etc. are to be used.**

**It seems impossible, but with a little practice you will be able to do it each and every time.**
